

第 2 回 日本 - 韓国国際微生物学シンポジウム
The 2nd Japan-Korea International Symposium on Microbiology

会期：1994 年 10 月 7 日（金）

会場：パピヨン 2 4 ガスホール（福岡市博多区千代 1-17-1）

会議：

（ ）特別講演

- ・ A Korean model for the elimination of leprosy
(Joon Lew, Lew Institute for Biomedical Research)

（ ）シンポジウム

（ 1 ）ビブリオ感染症

- ・ Seroepidemiological investigation on the Vibrio cholerae isolated recently in Korea.
(Ho-Hoon Kim, National Institute of Health)
- ・ Osmotic shock as a preventive measure for Vibrio vulnificus infection.
(Sun-Sik Chung, Dept. of Microbiology, Connam National University Medical School)
- ・ Vibrio vulnificus infection in Japan: Clinical and epidemiologic findings in fifty patients.
(Hiroshi Maeda, Dept. of Microbiology, Kumamoto University School of Medicine)
- ・ Hemolysins of pathogenic vibrios.
(Koichiro Yamamoto, Dept of Bacteriology and Serology, Research Institute for Microbial Diseases, Osaka University)

（ 2 ）抗酸菌感染症における最近の研究の進歩

- ・ Limited variation of DNA fingerprints (IS6110 and IS1081): The Korean strains of Mycobacterial tuberculosis.
(Sang-Jae Kim, Korean Institute of Tuberculosis, Korean National Tuberculosis Association)
- ・ Detection of mycobacterial antigens in clinical specimens for the diagnosis of leprosy and tuberculosis.
(Sang-Nae Cho, Dept. of Microbiology, Yonsei University College of Medicine)
- ・ Rapid diagnosis of Mycobacterium tuberculosis, Japan Anti-tuberculosis Association)
- ・ Recent studies on new anti-tuberculosis drugs.
(Haruaki Tomioka, Dept. of Microbiology and Immunology, Shimane Medical University)

この他に一般演題（口演発表 20 題程度・ポスター発表 35 題程度）も公募された。
